

Environmental Policy

Capital Rail Constructors (CRC) is committed to protecting human health and the environment. This commitment requires integration of employee health & safety and environmental consideration into all of our facilities, operations, and processes. It further requires that we operate in a manner that is environmentally responsible and that ensures the protection of the health and safety of our employees and the public.

CRC commits to following all applicable federal, state, and local codes, laws, ordinances, rules and regulations in all business practices.

We will continue to investigate opportunities where we can improve on our environmental stewardship and reduce our ecological footprint including the use of sustainable business practice that minimize waste and prevent pollution, ensure the health and safety of all employees, and dispose of wastes safely and responsibly.

Every employee and contractor of CRC is tasked and empowered to conduct their work activities in a safe and environmentally responsible manner and to report any actual or potentially dangerous condition, including environmental, health or safety concerns to CRC management. CRC management commits to promptly investigate and take necessary corrective action.

CRC is dedicated to maintaining the highest environmental compliance standards, which is good business practice and the right thing to do.
